April 2006

April 12, 2006 Chapter Meeting

Speaker: Mike Johnson

Fairfax County Park Authority Senior Archeologist; Archeological Society of Virginia (ASV) Project Director for Nottoway River Valley Paleo-American Survey; ASV Project Director for the Cactus Hill site excavations (1993-2002).

Topic - The Watlington and Koestline Sites: A Middle Archaic Settlement Pattern Shift between Morrow Mountain II and III.

In an effort to replicate Clovis and Pre-Clovis discoveries at the Cactus Hill site, ASV research on the Clovis and Pre-Clovis questions in the Nottoway River Valley of southeastern Virginia has expanded out to other sites. The presentation will focus on the geology and archeology that led to the conclusion that prehistoric people shifted their settlement pattern from the Watlington to Koestline sites at about 8,000 years ago and why.

New Virginia State Archaeologist

In a Virginia Department of Historic Resources (VDHR) news release, Director Kathleen Kilpatrick announced that she has selected Dr. Michael B. Barber for the position of Virginia State Archaeologist. Last session the General Assembly authorized and funded the position of State Archaeologist under a bill patroned by Delegate Marion Van Lanningham, a staunch friend of preservation and archaeology. This critical position represents both the fulfillment of a long-time, highest-order priority goal for VDHR and the professional and avocational community, and it offers a chance to launch a new beginning for Virginia archaeology.

Dr. Barber has extensive experience in Virginia and Middle Atlantic Archaeology. He is known for his work in ethnological and lithic analyses and as a field archaeologist who has implemented survey, testing, and excavations all across the Commonwealth. A graduate of the College of William & Mary, Mike holds a masters degree in anthropology/sociology from Kent State University and a doctoral degree in anthropology from the University of Virginia. He comes to us after retiring from a nearly 30-year career with the United States Forest Service. Mike will assume his duties on April 3.

From the President – Patrick O’Neill

Bristoe Station Cleanup

On March 25th and 26th, seven members of our chapter helped clean the brush from the graves at the 10th Alabama Cemetery at the Bristoe Station Battlefield west of Manassas. Not one to brag (ha!), but our chapter produced the largest number by far for the effort. C.K. Gailey, Maggie and Carolyn Johnson, Diane Schug-O’Neill, myself, and returnee Jackie Vollmer Cuyler were there both days and George Monken was there Saturday. We cleared about 1 to 1 1/2 acres of woods into an open area surrounding 60 to 65 depressions, all thought to be Confederate graves of the 10th Alabama from the fall of 1861. The battlefield is now the property of Prince William County.

Staff Historian David Born was on hand to help and guide the cleanup effort. More clean-up dates will probably be arranged in the future. Good job to all of you. The chapter should be proud!

Archeological Lectures & Events

Four staff members from the Cultural Resource Management and Protection Section presented papers at the Middle Atlantic Archaeology Conference (MAAC) in March addressing both prehistoric and historical archaeological topics of interest to Middle Atlantic archaeologists. This year's papers included:

- *"Developing a Cultural Resource Management Plan for Fairfax County, Virginia"* by Liz Crowell. The results of the process of developing the CRM Plan will be an update of the presentation she made to the NVC in February.

- *"Watlington and Koestline Sites: A Middle Archaic Settlement Pattern Shift in the Nottoway River Valley of Southeastern Virginia"* by Mike Johnson. Mike presented his research in Southeastern Virginia.
- *"The Examination of Early Historical Aerial Photography and its Implications"* by John Rutherford. His paper demonstrated the value of the historic aerial photographs in archaeological research. John, CK Gailey, and Scott Sizer of GIS recently geo-referenced these photos and they are now available as a GIS layer.
- *"Constructing Huntley: The Documentation of an Early 19th-Century Dwelling"* by Richard Sacchi. This was a report on the cultural resource studies of Huntley Historic Site, using the findings of numerous archaeological studies, a cultural landscape study, and historic structures report.

2006 Certification Field School and Volunteer Opportunities

A list of field schools and related opportunities suitable for satisfying certification requirements has been developed by Esther White, Mount Vernon archeologist, and forwarded by Michael B. Barber of ASV. This impressive list of opportunities can help you fill your field school requirement, some of your course requirements, and some of your historic or prehistoric field and lab hours. Check with the leaders at the links provided to see which school or schools best fit your needs. I've sent this to people on my NVC list. If you didn't get it and would like a computer version, email me at annpwood@comcast.net.
